Forecast for Sunday 15 May 2022

Weather: Cloudy with rain clearing north, possibly heavy with a low risk of a thunderstorm at first. The cloud will slowly break and lift through the morning, allowing a few sunny spells to develop although it is likely to remain rather cloudy over the northern part of the Park. Sunny spells becoming widespread at the end of the afternoon. Some showers moving north in the evening.

Chance of cloud-free hill tops above 600m: Generally 90% or better, but 60% in the first few hours after dawn.

Low cloud and visibility: The main cloud base will hold clear of the summits, however patchy cloud will cover some southeastern facing slopes above 500m in the first few hours after dawn. Generally good visibility below cloud.

Forecast for Monday 16 May 2022

Weather: Showers will become frequent and heavy during the early hours of Monday, with a risk of hail and thunder. These heavy and thundery showers will clear slowly northwards during the morning with sunny spells developing, but the sunshine will trigger further showers, these also heavy, mixed with hail and possibly thundery during the middle of the day. These will clear mid-afternoon onwards with cloud breaking to leave a fine evening with clear spells.

Maximum wind: South 25-30mph gust 35mph.

Chance of cloud-free hill tops 600m: 80% falling to 10% during the early hours. Improving to generally 60% by early afternoon and becoming 100% mid-afternoon onwards.

Low cloud and visibility: Patchy cloud near 500m in showers at first, with the main cloud base clear of the summits, but with extensive cloud developing on slopes above 400m during the early hours. Cloud lifting and breaking mid-morning onwards but with patchy cloud lingering on some slopes above 500m, especially in showers. Skies will clear mid-afternoon onwards with any lingering cloud staying above the summits. Visibility generally good below cloud, but falling to a few km or less in showers and thunderstorms.

Temperature: **Valleys:** Plus 12 Celsius becoming plus 18 Celsius.
At 600m: Plus 14 Celsius becoming plus 10 Celsius.
Freezing level: Above the summits.
